Capsule Series For Busy People?

Both of us have been getting requests from far and wide for materials on Bible and Science. It seems that there is a renewed attack against the scientific reliability of the Bible.

Once we decided to write such a book, a good number of our friends asked us for books which can be read even on mobile phones. Most of our young readers are busy professionals and they wish to read these books quickly and easily, and this series is our answer.

These books are designed in A5 size to make it very convenient to read on even small mobile phones. The size of each book is kept small so you can finish reading in 10 minutes.

Please help us by spreading these compact ebooks to your friends. These books can be sent even to your non Christian friends. Please spread the blessing and please create wide awareness that Bible contains no blunders of science.

Science In The Book of Job

We decided to start this series with three facts of science from the Book of Job because Job contains one of the oldest histories in the Bible.

Job was a contemporary of Abraham, which means this history and the words recorded in this book are almost 3800 years old. Nobody expects any facts of science in a human story written so many millennia ago. Rather, if such

an ancient book tries to speak on any topic related to science, it would be nothing except error. It is in this light that we need to see science in the book of Job.

Another thing, the book of Job contains dozens of references to the world of science. That is a surprise, and we present three of these statements below.

Air Has Weight

It is a well-known fact today that air has weight. Yet even today many educated people laugh at the idea that an invisible entity like air has weight.

If that is the situation of many people in the modern world, one can imagine the ignorance of people 3800 years ago about air. Yet, even during his great and unbearable anguish, Job says about God:

"When He imparted weight to the wind
And meted out the waters by measure"
Job 28:25

Job was no scientist. Nor was he any kind of technocrat. Yet what he stated is an amazing fact, that the air has weight.

Empirical study of the weight of air was done only very recently. The first one to do so was the great Italian scientist Evangelista Torricelli and that is why the unit of air-pressure (which is a manifestation of weight) is called Tor.

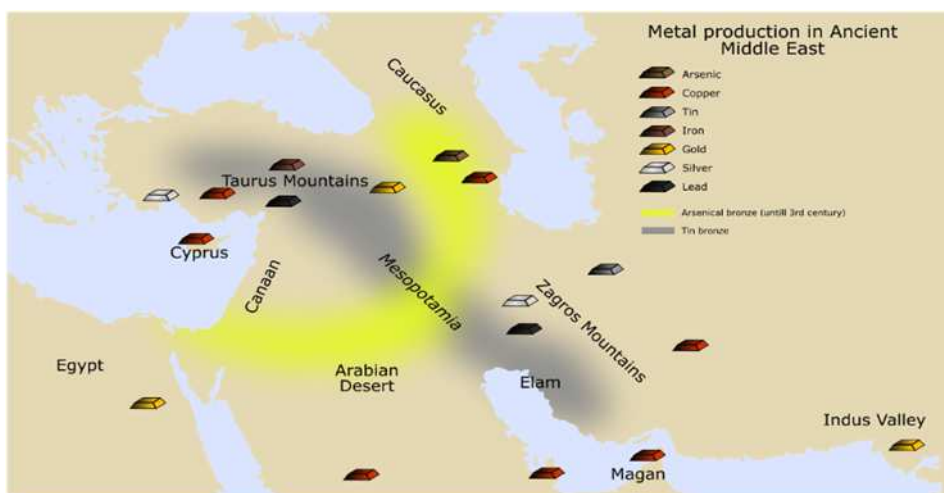

After many years of study, Torricelli published scientific details about weight of the air and the pressure exerted by it in AD 1644. That is almost 3000 years AFTER Job stated that air has weight. And Job was amazingly accurate – and modern.

Metallurgical Processes

Metals are an essential part of human society. However, metallurgy is not for everyone. Nor do common people know much about metallurgy.

Several metallurgical processes are mentioned in the Bible, some of them with striking modern-day parallels. For example,

"Surely there is a vein for the silver, and a place for gold where they find it. Iron is taken out of the earth and brass is molten out of the stone" (Job 28 : 1-2).

The above passage shows that Job, as far back as about 1800 B.C., knew clearly the how and what of metals extracted out of the earth.

This is surprising because he was only a farmer and animal husbandry-man. Such people are not authorities in metallurgy. However, when God the Holy Spirit guides and controls a

person, what he speaks will be scientifically accurate. It will not contain blunders.

The Earth's Interior

The earth is such a large structure that even today with all the modern boring technology humans have been able to bore only to about 1/1000th of possible depth. This means that nobody has seen the remaining inner 999/1000 of the radius.

Since modern man has seen only 8 kilometers of the 6000 kilometer radius of the earth, all the available information has come indirectly with the help of ultramodern equipment.

Job did not have access to modern scientific equipment 3800 years ago.

Today we know that the interior of the earth is made up of molten metals, and it is extremely hot. People of Job's time (C 1800 BC), who generally believed the earth to be flat, just could not have imagined a molten core for it. Yet Job seems to identify the very hot core when he says about the earth: "and under it is turned up as it were fire". (Job 28:56).

Summary

For thousands of years people had been trying to discredit the Bible. Such efforts have become very intense in the present century. However, the Bible has outlived all these attacks because it is the Inspired Word of God.

When the Bible makes a statement related to Science, it is always accurate. No established fact of science has ever contradicted the Bible, and no statement of the Bible has ever gone against any established fact of science.

About The Authors

Dr. Johnson C. Philip is an expert in Quantum-nuclear Physics and has done research about the inner structure of Protons and Neutrons (Hadrons). He has authored hundreds of books and he hopes to join hands with Dr. Saneesh Cherian to produce more than 100 volumes of these compact Bible/Science books to bless your spiritual life.

Dr. Saneesh Cherian is an expert in Communication and Sociology. Having completed two doctorates in theology and a masters in Sociology from a prestigious University, he has been working towards his next doctorate.

Together the two writers have authored several major books in Apologetics and Theology, Theology Dictionary and Bible Encyclopedias.

Hundreds of ebooks and pdf magazines produced by them are available for free download. You can contact them via: Webmaster@TrinityTheology.org
